- ☐ Dust Grey
- ☐ Graphite
- ☐ Light Grey
- ☐ Cashmere
- ☐ White

Gloss and Matt options available.

Appliances

Whilst renovating your kitchen, why not change your appliances to new models with the latest technologies?

We can even modify existing cupboards to take different sized models!

Storage

Improve your storage with new pull-out units and replacing your hinges and drawers with state of the art soft closing mechanisms

You can even turn a standard cupboard into a new set of drawers!

Worktops

Your fresh new look wouldn't be complete without new worktops, so why not pick from our worktop range from laminate and wood all the way up to quartz and granite?

How to Order

Step 1:
Pick a door and a colour.

Step 2:
Measure your existing
doors, measuring height in
millimetres followed by width
in millimetres (e.g. 715x395)

Step 3:
Count your end panels. These
will appear wherever the side
of a cupboard would otherwise
be visible. You will probably
have a mixture of base panels,
wall panels and tall larder
panels. You will also need a few
to make filler pieces for scribing
to the wall.

Step 4:
Measure the individual length
of your worktops, kick-boards
and any cornices/pelmets
across your wall units

Step 4:
If you want us to replace
your hinges or drawers with
new, soft closing ones, count
the number of hinges, and
note down next to a door
measurement if it also needs a
new drawer to go with it, we'll
know what size it needs to be
from that!
